Publication of E-Magazine, FIZIKA
Department of Physics , 26.06.2025

The Physics Honours students of Victoria Institution (College) have successfully published the 5th volume of their Annual E-Magazine, "FIZIKA," on June 26, 2025. This year's edition features a remarkable variety of articles spanning over foundational and contemporary topics in physics. Readers will explore cutting-edge research fields like spintronics, gravitational waves, black holes. Moreover, they will gain insight about the usage of smartphones in explaining everyday scientific phenomena through low cost innovative experiments and the physics behind the amusement park rides. Readers' journey continues through the wonders of cosmology, the origin and impact of the Moon, and humanity's ongoing search for extraterrestrial life.

Each article reflects the creativity, critical thinking, and scientific curiosity of the students. The collective work highlights the Department of Physics' commitment towards nurturing inquisitive minds and developing a passion for physics among its readers.

Total no participants : 9

Table of Contents

Title	Author	Page no.
Spintronics: The Bridge between Classical Electronics and Quantum Mechanics	Dhriti Nath (6th Sem)	1-3
Journal of Cosmic Harmony: Unveiling the Symphony of Spacetime	Ankita Paul (6th Sem)	4-8
Astronauts	Farriyah Arshi (4th Sem)	9-10
Moon: The Pride of our Blue Planet	Barnali Das (4th Sem)	11-12
A Cosmic Quest	Shweta Mukherjee (4th Sem)	13-16
The Physics Inside Your Smartphone: A Pocket-Sized Science Lab	Ariba Khanam (2nd Sem)	17-19
Cosmology: Unveiling the Mysteries of the Universe	Ariba Shamim (2nd Sem)	20-21
The Science of Black Holes	Karina Yadav (2nd Sem)	22-24
Riding the Equations: The Secret Physics of Your Favorite Thrills	Zarnaz Ahmed (2nd Sem)	25-27
