“FIZIKA-6th Volume” e-magazine by Department of Physics

published on 24-6-2026

The Physics Department of Victoria Institution (College) successfully published the 6th volume of its annual departmental e-magazine, "FIZIKA," on June 24, 2026. Continuing a proud academic tradition established in 2021, this year’s edition reflects the exceptional creativity, analytical mindset, and scientific spirit of the undergraduate students. The content spans across diverse fields of inquiry, exploring the mysteries of the cosmos down to the fundamental building blocks of nature. Readers will discover cutting-edge discussions on active matter physics, the mysteries of cosmic rogue worlds, and atmospheric geometrical optics behind rainbows. Furthermore, the edition highlights the interdisciplinary nature of modern physics, featuring articles on the acoustics of music, the physics powering Artificial Intelligence, GPS technologies, and the role of radio-physics in engineering climate-resilient agriculture.

Ultimately, this volume serves as a brilliant platform for scientific dialogue, fostering a robust scientific temper and inspiring readers to look beyond equations to explore the wonders of the universe.

Total no participants : 10

Front page of the magazine

Table of Contents

Title	Author	Page no.
The Cosmic Choreography: How Physics Awakens the Inanimate	Shweta Mukherjee (6th Sem)	1-5
Orphans Of The Cosmos : The Invisible Worlds Wandering The Dark	Barnali Das (6th Sem)	6-7
The Physics of Music and Sound	Karina Yadav (4th Sem)	8-9
Physics of Artificial Intelligence: How Science Powers Smart Machines	Ariba Khanam (4th Sem)	10-12
The Physics Behind Rainbows: An Analysis of Atmospheric Geometrical Optics	Talat Anjum (4th Sem)	13-14
CERN’s March 2026 Breakthrough: The Doubly Charmed Baryon Ξ⁺cc	Ariba Shamim (4th Sem)	15-16
Invisible Forces Around Us: The Physics Shaping Everyday Life	Zarnaz Ahmed (4th Sem)	17-18
Physics behind GPS Technology	Maghfera Sabnam (2nd Sem)	19-21
Physics Beyond Equations	Debanjali Prasad (2nd Sem)	22-23
Breaking the Code of Nature: How Radio-physics is Engineering the Future of Food	Jyotiska Biswas (2nd Sem)	24-25
