Thematic Workshop on
AI tools and Emerging Technologies for Innovators and Entrepreneurs

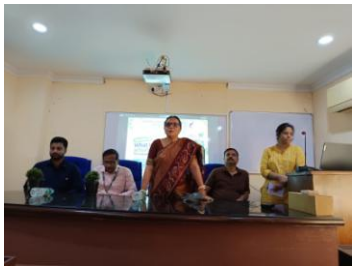

The Innovation Cell in collaboration with AI Lab, R&D Cell, and IQAC under the ages of Institution's Innovation Council (IIC) of Victoria Institution (College), successfully organized a hands-on workshop titled "What is AI Actually Doing? Moving Past the Hype (ChatGPT, Claude, Gemini Explained Simply)" on 25th November 2026 at Suniti Sabhaghar from 11am-4:30pm.
Designed for undergraduate students, the interactive session bridged the gap between theoretical AI concepts and practical entrepreneurship. The workshop was led by resource persons Shri Rajesh Mitra (Branch Head, Ardent Computech Pvt. Ltd.) and Shri Saikat Dutta (Sr Tech Analyst, Ardent Computech Pvt. Ltd.).

Key Highlights & Outcomes:
* Demystifying Generative AI: Students explored the capabilities and real-world applications of leading Large Language Models, including ChatGPT, Google Gemini, and Claude.

* AI-Powered Ideation & Validation: Participants identified real-world problems, conducted AI-assisted market research, and developed structured Lean Canvas business models.

* Developing innovative business ideas: Using tools like loveable AI, Canva AI etc students converted their innovative business concepts into functional landing pages, digital brochures, webpages, apps etc.

Enthusiastic student and faculty participants made this initiative a resounding success.
