

Educational trip to AJCBIBG, Howrah

On January 7, 2026, the **Department of Botany** of Victoria Institution (College) organized an immersive educational field visit to the **Acharya Jagadish Chandra Bose Indian Botanic Garden (AJCBIBG)**. The primary objective was to move beyond the confines of the classroom and allow students to engage directly with the living world, fostering a deeper appreciation for biodiversity, taxonomy, and environmental conservation.

Key Highlights of the Visit

1. Exploration of Plant Diversity

Students traversed various sections of the garden, observing a vast spectrum of flora. The visit served as a live laboratory for studying:

- **Taxonomic Groups:** Detailed observation of Angiosperms, Gymnosperms, and Pteridophytes.
- **Morphological Study:** Analysis of roots, stems, and leaf modifications in situ.
- **Economic & Medicinal Value:** Identification of plants used in pharmaceuticals and industry.
- **Visit To CNH.**
