

Teachers' Day Celebration (4th September 2025)

Since 5th September 2025 was a holiday, the students of Semester II, Department of Chemistry, organized a Teachers' Day celebration on 4th September in the departmental laboratory. Though only four students participated, their efforts made the programme lively and meaningful. The atmosphere was simple and informal, yet it carried warmth and respect.

The celebration began with cake cutting by the students, symbolizing joy and gratitude. A small gift was presented to the department, followed by a short moral talk delivered by the students to highlight the importance of teachers in guiding and shaping young minds. The teachers, in turn, gave brief reply speeches, encouraging the students to work hard and pursue knowledge sincerely.

The students had decorated the laboratory and arranged refreshments, which added charm to the programme. The event concluded with the distribution of sweets and cakes. Finally, a group photo was taken to preserve the memory of the day.

Though modest in scale, the celebration expressed deep appreciation and respect for the teachers. The active involvement of four dedicated students made the occasion special and memorable for both students and teachers of the Department of Chemistry.
