Students' Talk organized by the Department of Physics on 8.08.2026

A students' talk was held in the Department of Physics for Semester II students (Physics Major) on 08.08.2026 from 12 noon onwards. Three students participated in the event.

The students used the '*chalk and talk*' method for speaking on experiments which they would have to perform in the upcoming end semester examinations. The topics included conversion of ammeter to voltmeter & vice versa, determination of pressure coefficient and coefficient of linear expansion, Carey Foster's bridge, etc. The talks were followed by an interactive session where the teachers discussed probable questions that may be asked in the viva –voce part of their practical examination.
