## Students' Talk organized by the Dept. of Physics on 24.11.2025

A students'talk was held in the Department of Physics for Semester II ( Major) students on 24.11.2025. Five students participated in this event and spoke on the topics allotted to them like Conversion of Voltmeter to Ammeter and vice versa, Determination of Unknown Resistance by Carey-Foster's Bridge, Determination of Pressure coefficient using Jolly's apparatus, Determination of coefficient of linear expansion using Optical lever, Measurement of small current using Potentiometer etc.

Chalk and Talk method was used by the students. The topics primarily were based on the experiments given in the syllabus and performed by the students in the Laboratory. Each presentation was followed by a discussion session with the Teachers present there. Such programmes not only give the students an opportunity to improve their presentation and communication skills but also help them prepare for the viva –voce in their end semester practical examination.
